

Philip Agambisa

Letchworth Garden City | 07939 417982 | agambisa@gmail.com

Profile

AI-focused engineer with a background in Biomedical Engineering and healthcare technology, complemented by completion of an intensive one-year AI Engineer Traineeship and achievement of the Microsoft Azure AI Fundamentals (AI-900) qualification. Developing expertise in artificial intelligence concepts, machine learning fundamentals, cloud-based AI solutions, and the application of emerging technologies to solve real-world challenges. Passionate about leveraging AI, data-driven approaches, and digital innovation to enhance healthcare systems, improve clinical workflows, and support the development of intelligent medical technologies.

Key Skills

- Python Programming for AI and Machine Learning
- NumPy and pandas Python Libraries
- Machine Learning Model Development and Evaluation
- Deep Learning and Neural Networks (CNNs, RNNs)
- Natural Language Processing (NLP)
- Computer Vision and Image Analysis
- Data Handling, Cleaning and Pre-processing
- Version Control using Git and GitHub
- TensorFlow framework
- AI Model Deployment and MLOps Practices

Work Experience

Bedfordshire Hospitals NHS Foundation Trust

Jun 2025 – Present

Clinical Engineer

- Diagnosed and repaired faults in medical devices, undertaking electrical safety testing and commissioning/decommissioning equipment as required
- Maintained accurate records in the medical equipment management database, ensuring traceability and regulatory compliance
- Provided technical support to clinical staff, offering guidance on equipment use and escalating risks when necessary
- Managed stock of components, oversaw calibration of test equipment, and ensured alignment with the Quality Management System
- Supported the Medical Equipment Library by coordinating day-to-day activities and ensuring timely availability of equipment
- Engaged in continuous professional development, including attending OEM and specialist training courses to maintain technical expertise

West Hertfordshire Teaching Hospitals NHS Trust

Jan 2024 – May 2025

Medical Equipment Library Engineer

- Conducted maintenance, servicing, and repairs on medical equipment, using advanced fault-diagnosis techniques to identify and resolve issues, ensuring compliance with manufacturer guidelines and safety standards

- Maintained meticulous records of all activities, including equipment maintenance logs, updates in the equipment management database, and inventory tracking of components, while liaising with manufacturers for technical support and feedback
- Enforced adherence to accredited Quality Systems, ensuring all operations meet regulatory requirements and health and safety standards
- Provided training and guidance to healthcare professionals and technicians, enhancing their understanding of equipment operation and maintenance techniques
- Supported the development and optimisation of equipment workflows and processes, contributing to the efficient management of the medical equipment library and ensuring timely availability of devices for clinical use

West Hertfordshire Teaching Hospitals NHS Trust
Healthcare Support Worker

Apr 2023 – Jan 2024

- Provided compassionate and personalised care to patients, ensuring their physical and emotional well-being
- Assisted patients with activities of daily living (ADLs) such as bathing, dressing, grooming, and feeding
- Collaborated with nursing and medical staff to implement care plans
- Monitor and record vital signs, promptly reporting any abnormalities to healthcare professionals
- Assisted in patient mobility, transfers, and positioning to prevent pressure ulcers and maintain overall well-being
- Maintained accurate and up-to-date patient records, documenting observations, interventions, and progress
- Implemented infection control measures to prevent the spread of illnesses and maintained a clean and sanitised environment

MakersPlace, Ghana
STEM/STEAM Facilitator

Apr 2022 – Dec 2022

- Successfully taught and facilitated at multiple Makers Place centres, contributing to the company's mission of promoting STEM/STEAM education
- Assisted the Management Team in designing and developing STEM/STEAM curricula, resulting in engaging and effective learning experiences for students
- Implemented a data-driven approach to measuring student learning outcomes and progress, leading to improved student performance and satisfaction
- Developed and implemented innovative STEAM learning activities and materials that fostered hands-on learning and increased student engagement
- Demonstrated cultural competence and sensitivity by attending to individual student needs and effectively communicating with parents about their child's progress
- Provided extra support to students who needed it, resulting in improved student engagement and performance
- Engaged in Continuous Professional Development and research initiatives, demonstrating a commitment to ongoing learning and professional growth

Sahara Natural Resources, Ghana
Technical Assistant

Aug 2020 – Mar 2022

- Conducted XRF analysis on various types of samples, including metals, alloys, and minerals
- Prepared samples for analysis, including weighing, grinding, and pelletising

- Troubleshoot XRF instruments and laboratory equipment, repairing and replacing parts as necessary
- Worked closely with clients and provided technical support and assistance when necessary
- Participated in quality control and quality assurance processes to ensure accurate and reliable results
- Adhered to strict safety procedures, quality control standards, and regulatory compliance requirements
- Collaborated with other technicians and scientists to ensure that results meet project requirements

University of Ghana, Ghana
Intern

Jun 2019 – Aug 2019

- Assisted in conducting experiments and analysing data in various research projects
- Maintained laboratory equipment and ensured a safe working environment
- Collaborated with other lab members to complete projects on time and within budget

Mangel Klicks Company Limited, Ghana
Intern

Jun 2018 – Aug 2018

- Assisted senior technicians in the repair and maintenance of medical equipment
- Documented service activities in accordance with company policies and procedures
- Conducted tests on medical equipment to ensure compliance with safety standards
- Collaborated with the service team to resolve customer complaints and issues in a timely manner

Education and Training

2026: IT Career Switch Ltd

AI Engineer Traineeship (intensive, practical one-year program)

- Microsoft Azure AI Fundamentals qualification, specialising in AI concepts related to the development of software and services. More information on this certification can be found at:
 - <https://learn.microsoft.com/en-us/credentials/certifications/azure-ai-fundamentals/>

2020: University of Ghana
BSc Biomedical Engineering
