Professional Summary

Clinical Engineer with several years of experience maintaining, troubleshooting, and supporting safety-critical medical equipment within NHS hospital environments. Alongside my engineering career, I have developed practical AI applications using Python, machine learning, natural language processing, computer vision, and large language models, with hands-on experience in FastAPI, Flask, Streamlit, Hugging Face, OpenAI APIs, and scikit-learn. Through a portfolio of end-to-end AI projects, I have strengthened my software engineering, analytical, and problem-solving skills while gaining experience in designing, developing, testing, and deploying AI solutions. I am seeking to transition into a Junior AI Engineer role where I can combine my engineering background with AI development expertise to build intelligent, reliable, real-world software solutions.

Technical Skills

- Programming: Python, JavaScript, HTML5, CSS3, SQL, R
- AI & Machine Learning: Machine Learning, NLP, Computer Vision, LLMs, Prompt Engineering, RAG, Model Evaluation, Feature Engineering, Hyperparameter Tuning
- Frameworks & Libraries: FastAPI, Flask, Streamlit, Scikit-learn, TensorFlow, Hugging Face Transformers, OpenAI API, Pandas, NumPy
- Software Development: REST APIs, JSON, Git, GitHub, Visual Studio Code
- Cloud & Deployment: Microsoft Certified: Azure AI Fundamentals (AI-900), Render, Hugging Face Spaces
- Engineering: Software Design, Structured Problem Solving, Technical Documentation, Root Cause Analysis, Testing & Validation, Cross-functional Collaboration

Selected AI Projects

- Medical Text Summariser: Designed and deployed an end-to-end NLP application with automated ROUGE evaluation, demonstrating practical application of transformer-based language models to clinical text summarisation.
- Image Recommendation System: Developed a computer vision recommendation engine using CLIP embeddings and cosine similarity to retrieve visually similar images through an interactive web application.
- Trip Planner AI Agent: Built an AI travel assistant by integrating multiple APIs and Retrieval-Augmented Generation (RAG) to generate personalised, context-aware travel itineraries.
- Obesity ML Pipeline: Developed a reproducible end-to-end machine learning pipeline covering data preparation, feature engineering, model optimisation and performance evaluation.

Professional Experience

Clinical Engineer (Band 5) | Bedfordshire Hospitals NHS Foundation Trust | Jun 2025 – Present

- Diagnose, test, calibrate and repair safety-critical medical devices using structured fault-finding techniques.
- Perform commissioning, decommissioning and electrical safety testing in compliance with regulatory standards.
- Maintain technical documentation and asset records supporting traceability and audit readiness.
- Collaborate with multidisciplinary teams to minimise equipment downtime and improve service reliability.

Medical Equipment Library Engineer | West Hertfordshire Teaching Hospitals NHS Trust | Jan 2024 – May 2025

- Performed preventative maintenance, servicing and repair of medical devices.
- Conducted systematic fault diagnosis using engineering documentation and test equipment.
- Managed equipment records using asset management systems.
- Improved equipment availability through preventative maintenance planning and user support.

Healthcare Support Worker | West Hertfordshire Teaching Hospitals NHS Trust | April 2023 – January 2024

- Delivered patient-centred care within a multidisciplinary NHS team.
- Maintained accurate clinical documentation and supported safe patient care.
- Developed strong communication, teamwork and prioritisation skills within a fast-paced healthcare environment.

STEM/STEAM Facilitator | MakersPlace, Accra, Ghana | April 2022 – December 2022

- Designed and delivered engaging STEM learning programmes covering engineering, robotics and computational thinking.
- Developed practical learning activities that encouraged problem-solving and analytical thinking.
- Used data-driven approaches to monitor student progress and continuously improve learning outcomes.

Technical Assistant | Sahara Natural Resources, Accra, Ghana | August 2020 – March 2022

- Conducted X-ray fluorescence (XRF) analysis on metals, minerals and industrial samples following laboratory quality standards.
- Performed calibration, troubleshooting and preventative maintenance of laboratory instrumentation.
- Investigated technical faults and implemented corrective actions to minimise equipment downtime.

Education

BSc Biomedical Engineering – University of Ghana (2020)

Certifications

Microsoft Certified: Azure AI Fundamentals (AI-900)
